

Catholic Schools Week, 7th Grade Science Classes

We have been learning about Father Georges Lemâitre and his “Cosmic Egg.” On a clean sheet of paper, or a canvas, etc., please draw YOUR version of the Cosmic Egg or the beginnings of the universe. You may interpret it as you wish. You may use a scientific interpretation or a faith filled interpretation, or a beautiful combination of the two!

Below, write a paragraph (7-10 sentences) about what you think about the intersection of faith and science. (You may use the back as needed)

[illegible]
